

OUR TEAM & FACILITIES

Our staff of physical therapists, occupational therapists, certified hand therapists, certified athletic trainers, physical therapy assistants, and exercise physiologists provide the ultimate in rehabilitation. Our physical therapists and physical therapist assistants work in partnership with MDs to fine-tune post-operative treatments as well as communicate progress for non-surgical care. Using the latest technology, we offer competent, compassionate and personalized care.

CREATING A PERSONALIZED TREATMENT PLAN

Working with our orthopedists and other providers, our physical therapists devise an individualized treatment plan for the patient to get back to normal activity, work, and independence. As the plan progresses, the PT can adjust it according to the person's improvement or other issues that may come up.

PHYSICAL THERAPY

PERSONALIZED TREATMENT PROGRAMS FOCUSED ON REGAINING MOBILITY

Physical therapy is performed by our physical therapists (PTs), who are experts in body movement who work closely with individual patients to create personalized treatment plans. The goal of physical therapy is to maximize the individual's quality of life after injury, manage a chronic condition, recover from orthopedic surgery, and prevent re-injury.

This form of therapy involves:

- Collaborative approach by PTs and orthopedists
- Hands-on patient care
- Prescribed exercises
- Patient education and emotional support
